## An Example of a country liberating itself from national and/or Global Enslavement caused by the current New World Order.

As a good example of liberation from enslavement, we will choose **Greece** because it is a small country without strong self-defense against the big power of the [GEDWO](#) (Global Enslavement Digital World Order). From a cultural point of view, as the culture that invented democracy and philosophy as an enlightened virtuous discipline of freedom, **Greece** has also been the country that has been the main opponent to the current culture of global enslavement behind the [FODSWAGREC](#) conspiracy, having been so for more than two millennia. As a result, **Greece** has recently been the western country that has been enslaved more than all countries of the western world in the last decades, in particular since the global economic crisis of 2008. Of course, the full and proper justification for all the following steps of liberation from the [GEDWO](#) as appearing below can only be found in part in the [Synthesis](#) of the book, and in particular in the full book itself. So we will not repeat them here in their full details. The liberation from [GEDWO](#) for a country like **Greece** would then happen fully only through the following successive and cumulative 10 steps, and in probably not more than 5 years. Not achieving this liberation process would mean continuous current full suffering not only for 5 years, but in the best of cases, for at least 2 or 3 generations to come under full [GEDWO](#) enslavement by the [FastCABAL](#) (Fake AbrahamiC Satanic Team CABAL).

**The typical cumulative necessary 10 steps of liberation would thus be the following:**

### 01- SIGN AN AGREEMENT OF PROTECTION FROM A POWERFUL COUNTRY

Because small **Greece** would be fighting its liberation against the [GEDWO](#) (Global Enslavement Digital World Order) giant power, it would first and foremost start by making a formal bilateral agreement with another powerful country. The bilateral agreement would be made to appear to third countries to be essentially in terms of friendship, cultural exchange and economic cooperation, but it would also include good integrated terms of protection and defense from the more powerful partner in case of any kind of aggression from any other country or any [GEDWO](#) organization. That powerful partner for its bilateral agreement could never be one of the countries mainly pursuing the [GEDWO](#). For example it could never be **China** or the [USA](#), but not even other strong countries that are also already enslaved under the command of the [GEDWO](#), like **Germany**, or one of main [GEDWO](#) acolytes, like **England**. The only non-[GEDWO](#)-enslaved powerful countries are few, and some are too distant for eventual help, like for example **Japan**. **Russia** is not too far from **Greece** and appears as a good choice. In fact, **Russia** would be ideal for **Greece**, as **Greece** and **Russia** already share a strong common cultural affiliation to the Christian Orthodoxy religion.

### 02- EXIT SUPRANATIONAL EU ENSLAVEMENT AND RETURN TO DRACHMA

Once the bilateral agreement of protection is formalized, then the second step would be to get out of the supranational enslaving **Euro Zone** of the [EU](#) to start with. If a strong country like the [UK](#) was capable of excluding itself from the **Euro Zone**, and even get completely out of the [EU](#) through the **BREXIT**, then a small country like **Greece**, while being protected by **Russia**, could not

---

be prevented to act against the powerful [GEDWO](#) (Global Enslavement Digital World Order) member called the [EU](#) to start with.

But this would be only a first step. **Greece** would soon after have to decide to get out of the [EU](#) **completely** through its own **GREXIT**. Until **Greece** stays in the [EU](#), and does not use its own currency, it has no possibility to free itself from the immense [GEDWO](#) transnational power enslaving it. With the above steps, **Greece** would certainly already be facing the opposition of the strongest components of the immense [GEDWO](#) power for its complete financial destruction. But then, for its easier safeguard, **Greece** would at the same time reestablish its own drachma currency for full sovereign national monetary independence. To protect its new drachma currency, at least to start with, it could even peg it to the currency of its powerful protector, or the **Ruble** of **Russia** in this scenario. If this was not sufficient, **Greece** could also declare national bankruptcy if necessary. There would be no shame in doing so, except of course for the fake propaganda of the [GEDWO](#), because the financial enslavement of **Greece** was all done most unfairly, without proper justification by the infamous “**Troika**” that is the only entity that should bear the possible shame about an eventual Greek bankruptcy.

### 03- WITHDRAW COMPLETELY FROM THE NEW GLOBALIST NATO

As well demonstrated by the war by proxy against **Russia**, using **Ukraine** as a useful idiot, [NATO](#) has lost its Atlantic mission and has become the main tool of the [GEDWO](#) (Global Enslavement Digital World Order). This is not a war of **Russia** against **Ukraine**, but deceitfully a proxy war of the [USA](#) and [NATO](#) against the **Russia** of **Putin** that is disturbing the [GEDWO](#) power of the [FastCABAL](#) pursuing a dictatorial **One-World-Government** of full global enslavement. Nevertheless, once protected by still powerful **Russia**, and out of the [EU](#), then the third step for **Greece** would be to withdraw from at least the integrated military command of the [NATO](#) Alliance to start with. If a much stronger country like **France** was already able to do this partial [NATO](#) withdrawal, then little **Greece** protected by **Russia** could also easily do the same. But **Greece** should also leave [NATO](#) completely as soon as possible, hopefully at the same time. Because of its small size, this should not cause too much real concern from the alliance except of course for its strong propaganda opposing it. This step means that all American military bases in **Greece** should be nicely but forcefully invited to be closed and leave the country in the shortest possible delay. During that step, and to reinforce its alliance with its protector, **Russia** could be given exclusive access to a new sea port in **Greece**, without making it a Russian military base.

### 04- ELIMINATE ALL THE ENORMOUS UNNECESSARY PUBLIC DEBT

The poor little country of **Greece** has already unduly paid enormous interests on its own public debt, even more than the sum of the capital borrowed. It was also indebted not only excessively but unnecessarily through a terrible scam of the infamous unaccountable **Troika** ([IMF/ECB/EU](#)). **Greece** should even declare bankruptcy if necessary, but certainly at least declare unilaterally the cancellation of all its foreign debt. As for the public debt of its own national origin, **Greece** should not only delete it, but dismantle its own central bank issuing debt-money out of nothing, and start issuing its own new debt-free gold-backed **Drachma** by only its own treasury.

Of course, the latter would be strictly controlled by law (hopefully even by its constitution) and the new debt-free money in Drachma would only be used for brand new infrastructures or brand new services. Regular existing infrastructures and services would be entirely financed by taxation, but taxation only on property and sales, with no income tax (invented to reimburse a public debt that would not exist anymore). Its new taxation would be fully [DAFTATAP](#) (Dual Automated Fiscal Transaction Accruing Tax And Pension), with all sales transactions paid equally

---

on both sides at maximum 10% (on each side), while accumulating credits for an eventual public pension, and eliminating most of its black economy. In addition, it would make its own national public finances entirely transparent and accessible to be easily followed online by all citizens as if it were their own personal bank accounts.

## 05- NATIONALIZE ALL ITS NATURAL AND CULTURAL RESOURCES

During its recent [GEDWO](#) enslavement, in particular since 2008, **Greece** was forced to surrender the ownership of many important natural resources or infrastructures to criminal [GURUC](#) ([G](#)lobal [U](#)nelected [R](#)ed-technocratic [U](#)naccountable [C](#)abal) organizations like the [IMF](#), or foreign [GEDWO](#) corporations of the global foreign [FastCABAL](#). This has involved for example the loss of many of its sea ports and airports, let alone a lot of its own precious agricultural land. It has also involved the bankruptcy of many Greek farmers who were offered an attractive sum of money by the highly corrupted [EU](#) to stop producing many national products of its flourishing agriculture, and have **Greece** import them instead from big foreign corporations of industrial farming belonging to the [GEDWO](#) nomenclature based in distant countries like **Belgium, Holland, Israel, Morocco** or **Chile**. Because of their unjust loss and huge damage, all those national natural resources of **Greece** must be re-nationalized to return to be national property, and without compensation to foreign corporations that got their ownership fraudulently.

All new agriculture for national food production would also be encouraged through the [NoNAFPED](#) ([N](#)o [N](#)ew [A](#)gricultural [F](#)ood [P](#)roducts [E](#)quipment [D](#)e**bt**) new service. Similar help would also be available mutatis mutandis, through the [NoROPED](#) ([N](#)o [R](#)eactivating [O](#)ld [P](#)roduction [E](#)quipment [D](#)e**bt**) new service. This would also apply to other important producers of non-agricultural products useful to the country, for reactivating old production closed because of globalization, like it used to be the case for example in **Greece** before 2008 for shoes, clothing, and many hardware products. Help to farmers specifically would also come from its [NoTOSAP](#) ([N](#)o [T](#)ax [O](#)n [S](#)eeds [A](#)nd [P](#)lantations) new service. For all these new services, **Greece** would itself purchase and provide the necessary equipment with new debt-free **Drachma** money, and the Greek farmers or producers would get it free of charge to easily restart their national production.

New food street markets called [LAFIOSWO](#) ([L](#)ocal [A](#)griculture [F](#)ood [I](#)n [O](#)pen [S](#)treet [W](#)eekly [O](#)utlet), open in indicated places and weekdays would also provide agricultural food without sales tax for agricultural food that would also be as fresh as can be for being collected only at full maturity, and sold as closely as possible to the end consumer. Foreign agricultural food products would only be imported when the land of **Greece** is not yet producing them or has demonstrated not to be able to produce them properly.

Similar incentives through loans without interests would also apply to start new national exploitation of other natural resources, like all its oil and gas abundantly available under its land or sea. In the meantime, all foreign citizens would be encouraged to come to enjoy its uniquely beautiful sea, islands, and the rest of its natural and cultural resources, but these foreigners could not own real estate property in **Greece** that they would not use themselves to live in for at least a few months a year, or to exploit it themselves for an active commercial purpose.

## 06-SET DEATH PENALTY FOR ARSON AND DESTRUCTION OF NATURE

**Greece** natural agricultural resources are difficult to produce and protect because of its particular dry and rocky land. While a common tree may grow up in some 20 years in many countries, the same common tree will require probably 100 years growing up at the same length in **Greece**. In spite of this, hundreds of square kilometers of green forest and agricultural plants

---

are lost each year because of criminal arson. In the meantime, in the best agricultural areas of **Greece**, foreign corporations, in full complicity with the [EU](#), have, for years, paid Greek farmers to stop producing what used to be their exceptionally beautiful fruits or vegetables, in order to favor the import of the same kind of inferior products from big corporations based in distant places like **Belgium**, **Chile** or **Israel**. All this has produced a great irrecoverable impoverishment of **Greece** in the last decades, including in particular the near impossibility to ever recover the growing number of its essential lost forests.

Death penalty should probably never exist for one person killing another single person, like a husband killing the lover of his own wife. But the above crimes cause the death or full destitution of hundreds and thousands of persons each year in **Greece**, while they destroy an incredible economic value of natural resources essential to the better wellbeing of the whole country. As such, they fully deserve a death penalty, not only for the person acting as the criminals but even for those using, promoting, helping or paying these criminals to act on their behalf.

## 07- HAVE A PERFECT INFORMATION AND FRAUD-LESS VOTING SYSTEMS

**Greece's** new voting system would be put in place as the bio-anonymous [BAVAD](#) ([B](#)iometric [A](#)nonymous [V](#)oting [A](#)dmission [D](#)atabase) system promoted by [FtakAristarchy](#). With this system in place, **Greece** should start to hold perfectly honest elections without any possible kind of fraud. It would elect a small executive under a strictly fully binding electoral **contract**, a [BEC](#) ([B](#)inding [E](#)lectoral [C](#)ontract), instead of a mostly useless electoral program. To ensure full democratic debate leading to best possible elections, **Greece** would also [enforce an absolute full freedom of speech](#), even for the so-called hate-speech. This liberty would not exist for only a constructed lie about public affairs or public officials, while truth, as harsh as it could be, would always be permitted. In turn, lies would always be punished most severely through mainly [PPPP](#) ([P](#)ersonal [P](#)roperty [P](#)riority [P](#)unishment) in top priority instead of jail or financial sentences. All its national [media would be made independent and competing for truth](#) between each other. None would be part of any possible foreign media cartel. Internet would become [FtakInternet](#), through [WIFI](#) (4G would be its maximum level), but granted free of charge to all persons in the country. At the same time, **Greece** would [abolish all secrecy in all communications](#), including in diplomatic relations, except temporarily when a criminal investigation is being conducted about the related business of the persons involved.

## 08- GET FREE FROM ALL UNACCOUNTABLE ORGANIZATIONS

From then on, **Greece** shall have no formal membership to any [GURUC](#) ([G](#)lobal [U](#)nelected [R](#)ed-technocratic [U](#)naccountable [C](#)abal) organizations like the [EU](#), the highly corrupted [WHO](#) in particular financed by the private interests of rich individuals or corporations with conflicts of interest, or the [UN](#). **Greece** could still collaborate with all of them in various ways and places when useful for its own interests, and even pay a fee for the services received if and when required. But it would not sign a formal membership until such [GURUC](#) organizations become fully [FTAT](#) ([F](#)ull [T](#)ruth [A](#)nd [T](#)ransparency) compliant in both all of their actions and all of their finances.

## 09- IMPLEMENT FULL NEUTRALITY IN A REDUCED GOVERNMENT SIZE

At this point, **Greece** would dismantle its useless outdated elephantine parliament and have a slim [TetractArium](#) to govern the country as a new [FtakAristarchy](#) through a series of fully binding [BEC](#) ([B](#)inding [E](#)lectoral [C](#)ontracts). It would impose a [mandatory legal duty to vote to maintain citizenship](#), but voting better than ever before, with the enlightenment of full truth information,

---

no secrecy about public affairs, full liberty of speech and opinion, and better holistic education. It would also vote in a perfect fraud less [BAVAD](#) system, [voting for only a small executive](#) operating by contract during short electoral mandates of 3 years each. It would close most of its embassies that are now useless with the advanced modern telecommunications. It would reinforce all its consulates abroad to better assist citizens in difficulty while abroad, and to select all possible candidate immigrants before they reach the country.

**Greece** would also be made a kind of superior little *Switzerland* of the south of Europe, with absolute full neutrality in relation to all other countries or to rich private national or foreign person with money overpower. It would have **no** other form of external dependency from any supranational or [GURUC](#) (Global Unelected Red-technocratic Unaccountable Cabal) international entity. As such, it would [never get involved in wars](#) or in sanctions to undemocratic countries except when these countries would be menacing its own citizens or national territory. Its [justice would also be highly simplified and obtained in the easiest possible way](#) compared to other countries, with all interpersonal conflicts resolved in the fastest and cheapest possible way.

## 10- RECUPERATE THE BEST OF ITS LIFE, CULTURE AND LANGUAGE

The country of **Greece** is small, but a giant in many ways. It is the country that has invented democracy, philosophy, holistic education, the Olympics and all the rest of its [Philotimo. Its language has been superior to most other languages for at least 5000 years](#). All this unique and incredible baggage of culture has been greatly damaged by plan, by the Greek and foreign members of the [FastCABAL](#), in the last few decades. All the above would be made to return proudly at its best level as soon as possible, with [no indoctrinating education](#), only the holistic education as invented by **Greece**.

This process of recuperation of best cultural energy would be encouraged and facilitated through two reforms. First, the return of the [holistic education of the three levels of the Pythagorean Tetractys](#) of the human soul. Second, integrated in its new holistic education, the awareness and use of a constructive spirit of best achievements and behavior through the personal and national [Sacred Torus](#) of universal energy making each citizen best possible [PICCOB](#) (Promethean Idyllic Co-Creator Of Beauty) for the good of the country.

At the moment, the [Sacred Torus](#) of the beautiful planet Earth is devastated by a very negative Torus of global destructive energy to the point that our conscious planet is contemplating humanity's punishment through a possible change of its axel, like it has already famously done at least once, for the destruction of **Atlántida**, and has happened a few other times previously in the past, in order to achieve a complete cultural reset, and the regeneration of a new and more positive global Earth [Sacred Torus](#) for the benefit of itself and of all of humanity.

Hopefully it is not too late for achieving a more positive change less dramatically, through **The Great Return of Philosophy and Beauty** in our life, in both our personal and our civic life, and **The Sacred Marriage of Science with Philosophy**, as promoted and possible through the use of [FtakAristarchy](#) governance. For that **Great Return**, great little **Greece** would logically be the ideal place to restart, doing so with [FtakAristarchy](#), considering the magnificent culture of [Philotimo](#) that **Ancient-Greece** has given us so brilliantly in the past in the best moments of the history of humanity. This is the **Great Return** that humanity needs at the moment, not the deceitfully destructive and satanic **Great Reset** of the [WEF](#). **Greece** would then reacquire [best possible life social decorum](#) with [least possible forms of cultural or physical pollution](#)

---

---

Following the above 10 steps, a country like **Greece** could achieve rapidly its full liberation from national and global satanic enslavement and be, once again, a good example of real democracy and civilization for the rest of the world. Certainly, **Greece** would suffer during the above process of radical reforms, but probably for not more than 5 to 10 years. Not getting free from the [GEDWO](#) (Global Enslavement Digital World OrdEr), not to say from the current [SEGWO](#) (Satanic Enslavement Global World OrdEr) under the growing power of the globalist [FastCABAL](#) (Fake Abrahamic Satanic Team CABAL), it would face much more sufferance for probably many generations to come. It is better to suffer for up to 10 years than for 100 years or more.

If **Greece** does not follow the above steps, it will possibly face a complete destruction of its beautiful ancient culture, which is what the [FastCABAL](#) (Fake Abrahamic Satanic Team CABAL) has constantly wanted in at least the last two millennia. By following the above 10 steps, **Greece** would become a good example of what so many other countries could do, mutatis mutandis, to also achieve their own full independence from the [GURUC](#) (Global Unelected Red-technocratic Unaccountable Cabal) [FastCABAL](#) seeking our global and satanic enslavement in their pursuit of a dictatorial **One-World-Government** that, in their wildest dreams, shall eventually be established in the [JerUSAlem](#) of a [Greater Zionist Israel](#) as soon as possible after the planned fall of other sources of competitive global power now established in places like the [USA](#), the [EU](#) and even the paper dragon of **China**.

---
